

INSTITUTIONAL PROOF REPORT

AgenThink Mesh — Decision Intelligence Layer

Helios North Offshore Wind

Session: sess-test-002 · Mode: GCC · Generated: 10 Jun 2026

FINAL RECOMMENDATION REJECTED 7 of 10 Personas Opposed Approval Confidence: 72%	GOVERNANCE REVIEW PARTIAL COMPLIANCE CFA Fidelity: 84.1% · 2 Revisions Applied AUDIT STATUS RELEASED Eligible for Institutional Export
---	--

† Audit Status indicates whether this proof record is eligible for export and audit review. It does not indicate investment approval.

INSTITUTIONAL PROOF STATEMENT This recommendation was produced through a 10-persona deliberative process, audited against Constitution v1, evaluated using calibration data and historical precedents, and validated through governance controls. The recommendation below represents the final council position after all constitutional review procedures were completed.	PROOF COMPLETENESS 5 of 6 evidence sources available Council session data CFA audit records Outcome ledger entry Calibration weights Historical precedents Audit trail references
---	---

Council rejected the deal. 7 of 10 personas opposed approval. CFA fidelity: 84.1%. The council identified significant liquidity risk and ESG compliance gaps.

Report ID: test-002 · Version: 3.1 · Constitution v1

4.

Outcome Performance Summary

Outcome Intelligence Not Yet Available.

This section is populated as council decisions are resolved over time. Outcome data is recorded when a deal reaches a verifiable post-decision state (closed, failed, materially changed). Once sufficient resolved decisions are available, this section will display prediction accuracy, false positive rate, false negative rate, and materialization rate.

5.

Why AgenThink Mesh Is Different

TRADITIONAL IC REVIEW vs. AGENTHINKMESH

DIMENSION	TRADITIONAL IC REVIEW	AGENTHINKMESH
Decision Process	3–5 human analysts, sequential review, subject to anchoring bias and availability heuristics.	10 calibrated AI personas deliberate in parallel, each with a defined constitutional role and bias profile.
Historical Recall	Analyst memory and manually curated precedent databases. Coverage is limited and inconsistent.	Automated precedent retrieval from the Outcome Ledger across all prior council decisions.

Governance Audit	Post-hoc compliance review. Governance is checked after the decision, not during deliberation.	Constitutional Fidelity Auditor (CFA) runs during deliberation. Every persona vote is audited against the active constitution.
Outcome Calibration	Analyst track records are informal and rarely quantified. Brier scores are not computed.	Each persona carries a Brier score and calibration weight derived from resolved historical decisions.
Traceability	Meeting notes and email trails. Reconstruction is manual and incomplete.	Every vote, revision, and governance event is logged with a cryptographic session ID and timestamp.
Exportable Audit Trail	Not standardised. Audit preparation requires significant manual effort.	This report. Exportable on demand. Includes evidence chain, audit references, and traceability appendix.

9. Governance Findings

Finding ID	Rule ID	Status	Severity	Rule Text
gf-p2-ESG-3	ESG-3	VIOLATION	WARNING	ESG-3 violated by ESG Analyst — carbon offset obligations not adequately weighted
gf-p4-LIQ-1	LIQ-1	VIOLATION	CRITICAL	LIQ-1 violated by Liquidity Analyst — hard flag triggered for liquidity risk

10. Constitution Version References

Version	Active Rules	Description
v1	8	Initial Constitution — 8 governance rules covering ESG, liquidity, concentration, and regulatory compliance

11. Contradiction Analysis

No inter-decision contradictions detected. This module requires at least two completed decisions in the same council mode to produce findings.
